## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fussell et al.

Fussell et al. teaches a disk drive carrier 12 enclosing computer disk drive 25 with drive interface connector 46. A computer storage chassis 10 has an opening 22 in the front wall to receive the disk drive carrier and a plurality of electrical connectors 112, 112A by which the disk drive enclosed in the disk drive carrier is connected to host computer 14. Board 44 is connected to the carrier and has electrical connector means 42 to connect the drive interface connector to the plurality of connectors at the rear of the storage chassis. With respect to the board 44 being replaceable it is noted that the board has sockets 44a, 44b to receive pins and thus operates in a plug-in fashion. The board is inherently removable as is conventional with most modular computer components to allow for replacement of worn out parts and for upgrades.

Claim 8 is allowable over the prior art.

Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the disk carriers of Winick et al., Oura, Shikano and Tirrell et al.
